## LASER-ENGRAVED SILICONE CYLINDER FOR ENGOBE APPLICATION

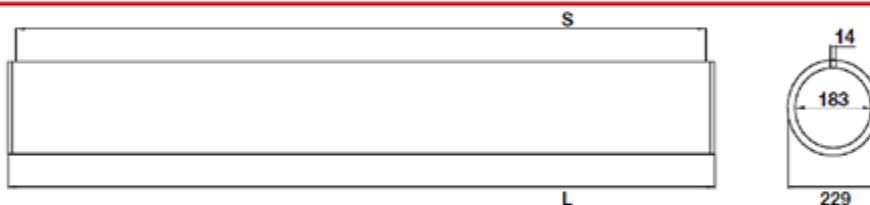

**Seedex**  
Printing Products, Technology and Services from Italy

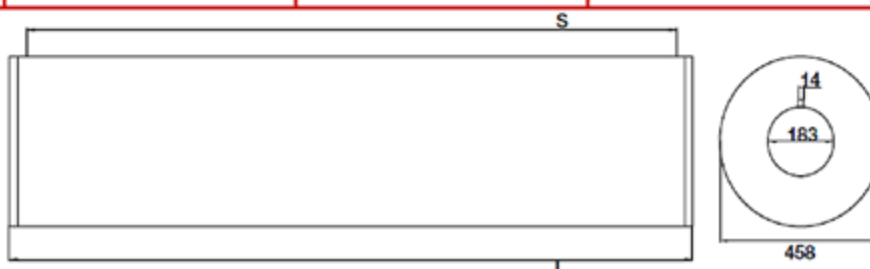

- Laser performed engraving enables to decide quantity of engobe to be applied, thanks to the different depths available, and to customize designs with the possibility to insert writings and company logos.
- The combination among different silicone compositions and various typologies of polyurethane mats allows to engobe each kind of slab, even when the surface is not perfectly flat.
